A ROAD IN THE RIGHT DIRECTION

Covering the Cities of San Dimas, La Verne & Claremont • June 1999 Editor: Rick Holland

CALTRANS GOOD NEIGHBOR ADVANTAGE PROGRAM IS HERE !

That's right! The Caltrans Good Neighbor Advantage Program has arrived. What is this program? You might ask. Well, the Good Neighbor Program is a program created by Caltrans that will allow everyone involved in the construction process (businesses, residents and Caltrans) to work as a team, creating a positive situation (an advantage) for everyone.

Councilman Patrick Gatti, city of La Verne said, "The Caltrans Good Neighbor Advantage Program is a great idea. It has benefits for everyone. Over the next couple of years, teamwork will be important in constructing the freeway. I fully support the program and I hope the community will also."

This is how the program works: Enclosed in the newsletter is the Caltrans Good Neighbor Advantage Card. Simply cut out the card located on page three and take it with you while shopping or dining out. Caltrans has recruited over 50 businesses in La Verne and Claremont to participate in a program that offers customers 10% off on their goods

and services (offer may vary in some stores). The participating businesses also allow Caltrans to post periodic construction notices or safety messages at their store. The customer simply walks into the participating store, shows his Advantage Card or mentions the Caltrans Good Neighbor Advantage Program and re-

Although the intent of Caltrans is to stay as invisible as possible during construction, we realize the impact a construction project of this magnitude can have on residents and businesses in the area. With this in mind, Caltrans will continue to take several steps that allow us to keep the community informed (newsletters, cable television, local newspapers, satellite office, informational meetings, etc.). These communication vehicles are working very well, but Caltrans wants to do all it can in extending itself as a "Good Neighbor." It takes a lot of effort, teamwork and cooperation from everyone involved to complete a project as large as the 210. Teamwork is important. Not only between Caltrans and the contractors constructing the freeway, but also between Caltrans and the community.

Construction crews working hard to finish bridge at Indian Hill.

Remember!! Keep Safety First!! Slow Down! Stay Alert! Drive with Caution!!

If you are interested in participating in the program, or you would like more information, please contact Rick Holland at (213) 897-3819.

The participating vendors of the Good Neighbor Program are listed on the following page.

CONSTRUCTION UPDATE

Bridge construction is in process at Indian Hill and Towne Avenue. The building process at these locations is as follows:

- The first step is the pouring of the abutments, footings, and columns
- After the abutments, footings and columns are poured, the next step is construction of falsework

At Indian Hill, construction crews have poured footings for abutments. The falsework is done.

At Towne Avenue, crews are pouring abutments and columns.

Because of the elevation of water at Thompson Creek and the height of Piedmont Mesa, the freeway will not be depressed just

east of Thompson Creek. The portion that will not be depressed will be less than a quarter of a mile.

Periodically there will be a flagman on Sumner just south of Baseline, starting the second week in June. The purpose of the flag-

man will be to allow construction crews to build an embankment to go over Thompson Creek and Piedmont Mesa.

DATES TO REMEMBER

The Route 210 Satellite Office will be open Saturday, June 26th from 10 a.m. to 3 p.m.

Temporary Easement Update

In the city of Claremont, there are over 180 properties Caltrans needs temporary access to. Of these, most have been appraised and have received their first offer from Caltrans. Over 50 have already closed escrow.

In the city of La Verne, there are over 280 properties needed. Of these, over 150 have been appraised and over 130 have closed escrow.

Caltrans appreciates the cooperation it has received from the residents of La Verne and Claremont during this process. Your continued support is needed. If there are any questions or concerns you have, please contact Rick Holland at (213) 897-3819.
